PROFESSIONAL PROFILE

Motivated and hands-on Information Technology professional with practical experience in web application development, ICT support, system deployment, database management, networking, and technical troubleshooting. Experienced in developing and deploying real-world applications using Python, Django, Django REST Framework, React, JavaScript, PostgreSQL, Git, Cloudinary, Render, and Vercel/Netlify.

Completed practical ICT attachment experience with the County Government of Kericho, supporting users, troubleshooting hardware and software issues, maintaining ICT infrastructure, assisting with network connectivity, and supporting e-government systems.

A proactive problem-solver who enjoys transforming business requirements into practical technology solutions. Currently seeking an opportunity in software development, ICT support, systems administration, or related technology roles where I can contribute, learn, and grow professionally.

CORE COMPETENCIES

- Full-Stack Web Development
- Python & Django Development
- Django REST Framework
- React & JavaScript
- REST API Development & Integration
- PostgreSQL & MySQL
- Database Design & Management
- ICT Technical Support
- Hardware & Software Troubleshooting
- Computer Networking
- LAN/WAN Support
- System Deployment & Configuration
- Git & GitHub
- Cloud Deployment
- API Integration
- Responsive Web Design
- System Analysis & Documentation
- Technical Problem Solving
- User Support & Training
- Microsoft Office Suite (Word, Excel, PowerPoint, Outlook)

TECHNICAL SKILLS

Programming:

Python, JavaScript, PHP, HTML5, CSS3

Frameworks & Libraries:

Django, Django REST Framework, React, Vite

Databases:

PostgreSQL, MySQL, SQLite

Tools & Platforms:

Git, GitHub, VS Code, Cloudinary, Render, Vercel, Netlify, Docker

Networking & ICT:

LAN/WAN, TCP/IP fundamentals, network troubleshooting, hardware maintenance, printers, UPS systems, server support

Other:

REST APIs, authentication, CRUD systems, responsive interfaces, deployment configuration, environment variables, system documentation

PROFESSIONAL EXPERIENCE

ICT ATTACHMENT

County Government of Kericho

Kenya

- Provided first-level ICT support to staff and assisted in resolving day-to-day hardware, software, and connectivity issues.
- Assisted with troubleshooting and maintenance of computers, printers, UPS systems, and other ICT equipment.
- Supported preventive maintenance activities to improve the reliability and availability of ICT equipment.
- Assisted with LAN/WAN troubleshooting and basic network infrastructure support.
- Participated in maintenance and support of fibre/network connectivity.
- Assisted users with software, system, and general technical issues.
- Maintained and updated helpdesk/support records and logs.
- Supported e-government systems and other ICT services used within the organization.
- Assisted with server and infrastructure-related support activities under supervision.
- Worked collaboratively with ICT staff to diagnose technical problems and implement practical solutions.

PROJECTS

Farm Milk Hub — Cooperative Management System | Full-Stack Developer. Developed a web-based cooperative management platform designed to digitize operations within dairy cooperatives.

- Farmer and cooperative management
- Milk collection management
- Collection-center assignment
- Officer and staff management
- Milk payment processing
- Cooperative administration
- Raw milk sales management
- Role-based access control
- REST API integration
- PostgreSQL database

- Cloud deployment
- Technologies: React, Vite, Django, Django REST Framework, PostgreSQL, Cloudinary, Render, Vercel

Kenya Political Lies Detector System (KPLDS) | Final-Year Software Project. Developed a technology solution focused on assisting users in evaluating political claims and presenting supporting evidence.

- Political claim submission
- Claim classification
- Evidence retrieval
- Screenshot/OCR processing
- AI-assisted claim analysis
- Confidence scoring
- Evidence presentation
- Administrative and analytics functionality
- Technologies: React, TypeScript, Django, Django REST Framework, Python, Gemini, Groq/Llama, SBERT, FAISS, OCR

BetTipWise / BetWin | Full-Stack Developer. Developed and deployed a web-based prediction management platform with administrator-controlled content and time-based access.

- Administrator content management
- Access-code based customer access
- Regular and VIP prediction plans
- Prediction image management
- Booking code management
- Expiry-based access
- Public results section
- Cloud image storage
- REST API integration
- Technologies: React, Django, PostgreSQL, Cloudinary, Render, Netlify

CycleShare Hub | Full-Stack Developer. Developed a multi-tenant bicycle-hire management platform supporting bicycle management, customer access, event pricing, QR-based lookup, and administrative operations.

- Technologies: React, Vite, Django, Django REST Framework, PostgreSQL, Cloudinary, Channels

EDUCATION

Bachelor of Science in Information Technology

Karatina University, Kenya

Coursework completed

Relevant areas include:

- Software Development
- Database Systems
- Computer Networks
- Systems Analysis & Design
- Information Systems
- Web Development
- Computer Security
- IT Project Management

Kenya Certificate of Secondary Education (KCSE)

Simoti Secondary School, Kenya

2022

CERTIFICATIONS

Cisco Certified Network Associate (CCNA) — 2024

Website Development Scholarship — eMobilis, 2024

Introduction to Cybersecurity — Cisco, 2023

ADDITIONAL EXPERIENCE & STRENGTHS

-Practical experience building applications from business requirements to deployment. - Strong interest in solving real-world problems through technology. - Comfortable working with both frontend and backend technologies. - Able to troubleshoot technical issues systematically. - Experience working with clients/users to understand requirements. - Familiar with Git-based development workflows and cloud deployment. - Strong willingness to learn new technologies and adapt to different technical environments.
